

COMPOUND SOUND GENERATORAbstract of the Disclosure

A case is provided for mounting an information equipment  
5 and a frame of the compound sound generator is set in the  
case. A speaker and receiver are provided in the frame. A  
first back chamber is formed in the speaker and a second back  
chamber is formed in the receiver. A baffle is formed  
integrally with the frame so as to separate the first and  
10 second back chambers from each other.
